

What We Do Exactly

Comtec Energy is an emerging designer, system integrator and solution provider of Solar energy systems of any connectivity type including on-grid, off-grid and Hybrid. The renewable Solar has proven its winning economics; we craft its financial viability too. Designing lowest total cost of ownership (TCO) for any project is our focal expertise. We believe we know the science of Solar energy a bit and thus can save you much in your energy bills by design & knowledge. Based in Islamabad, the country's center of renewable energies, Comtec Energy is well positioned to undertake Solar power generation projects of various sizes and magnitudes.

Our Quality Products

A company is known by the products it keep, then a product is known by the quality it has, Comtec Energy is very conscious in product offerings, hence engage with brands of international repute including some worlds' famous companies like Franklin Electric (USA), Outback Power Inc. (USA), Zigor Corporation (Spain), Voltronics Inc. (Taiwan), Goodwe/MCA (China) etc., We have developed our own brands of Solar Panels, LED street lights (AC / DC types) in that spirit too and engineered metal mounting systems of very high standard. We promise to follow quality as our focal selection criteria for products that we may include in our portfolio to give you the best value of money.

SOLAR SOLUTIONS

Energy invigorates life - ADORE ENERGY

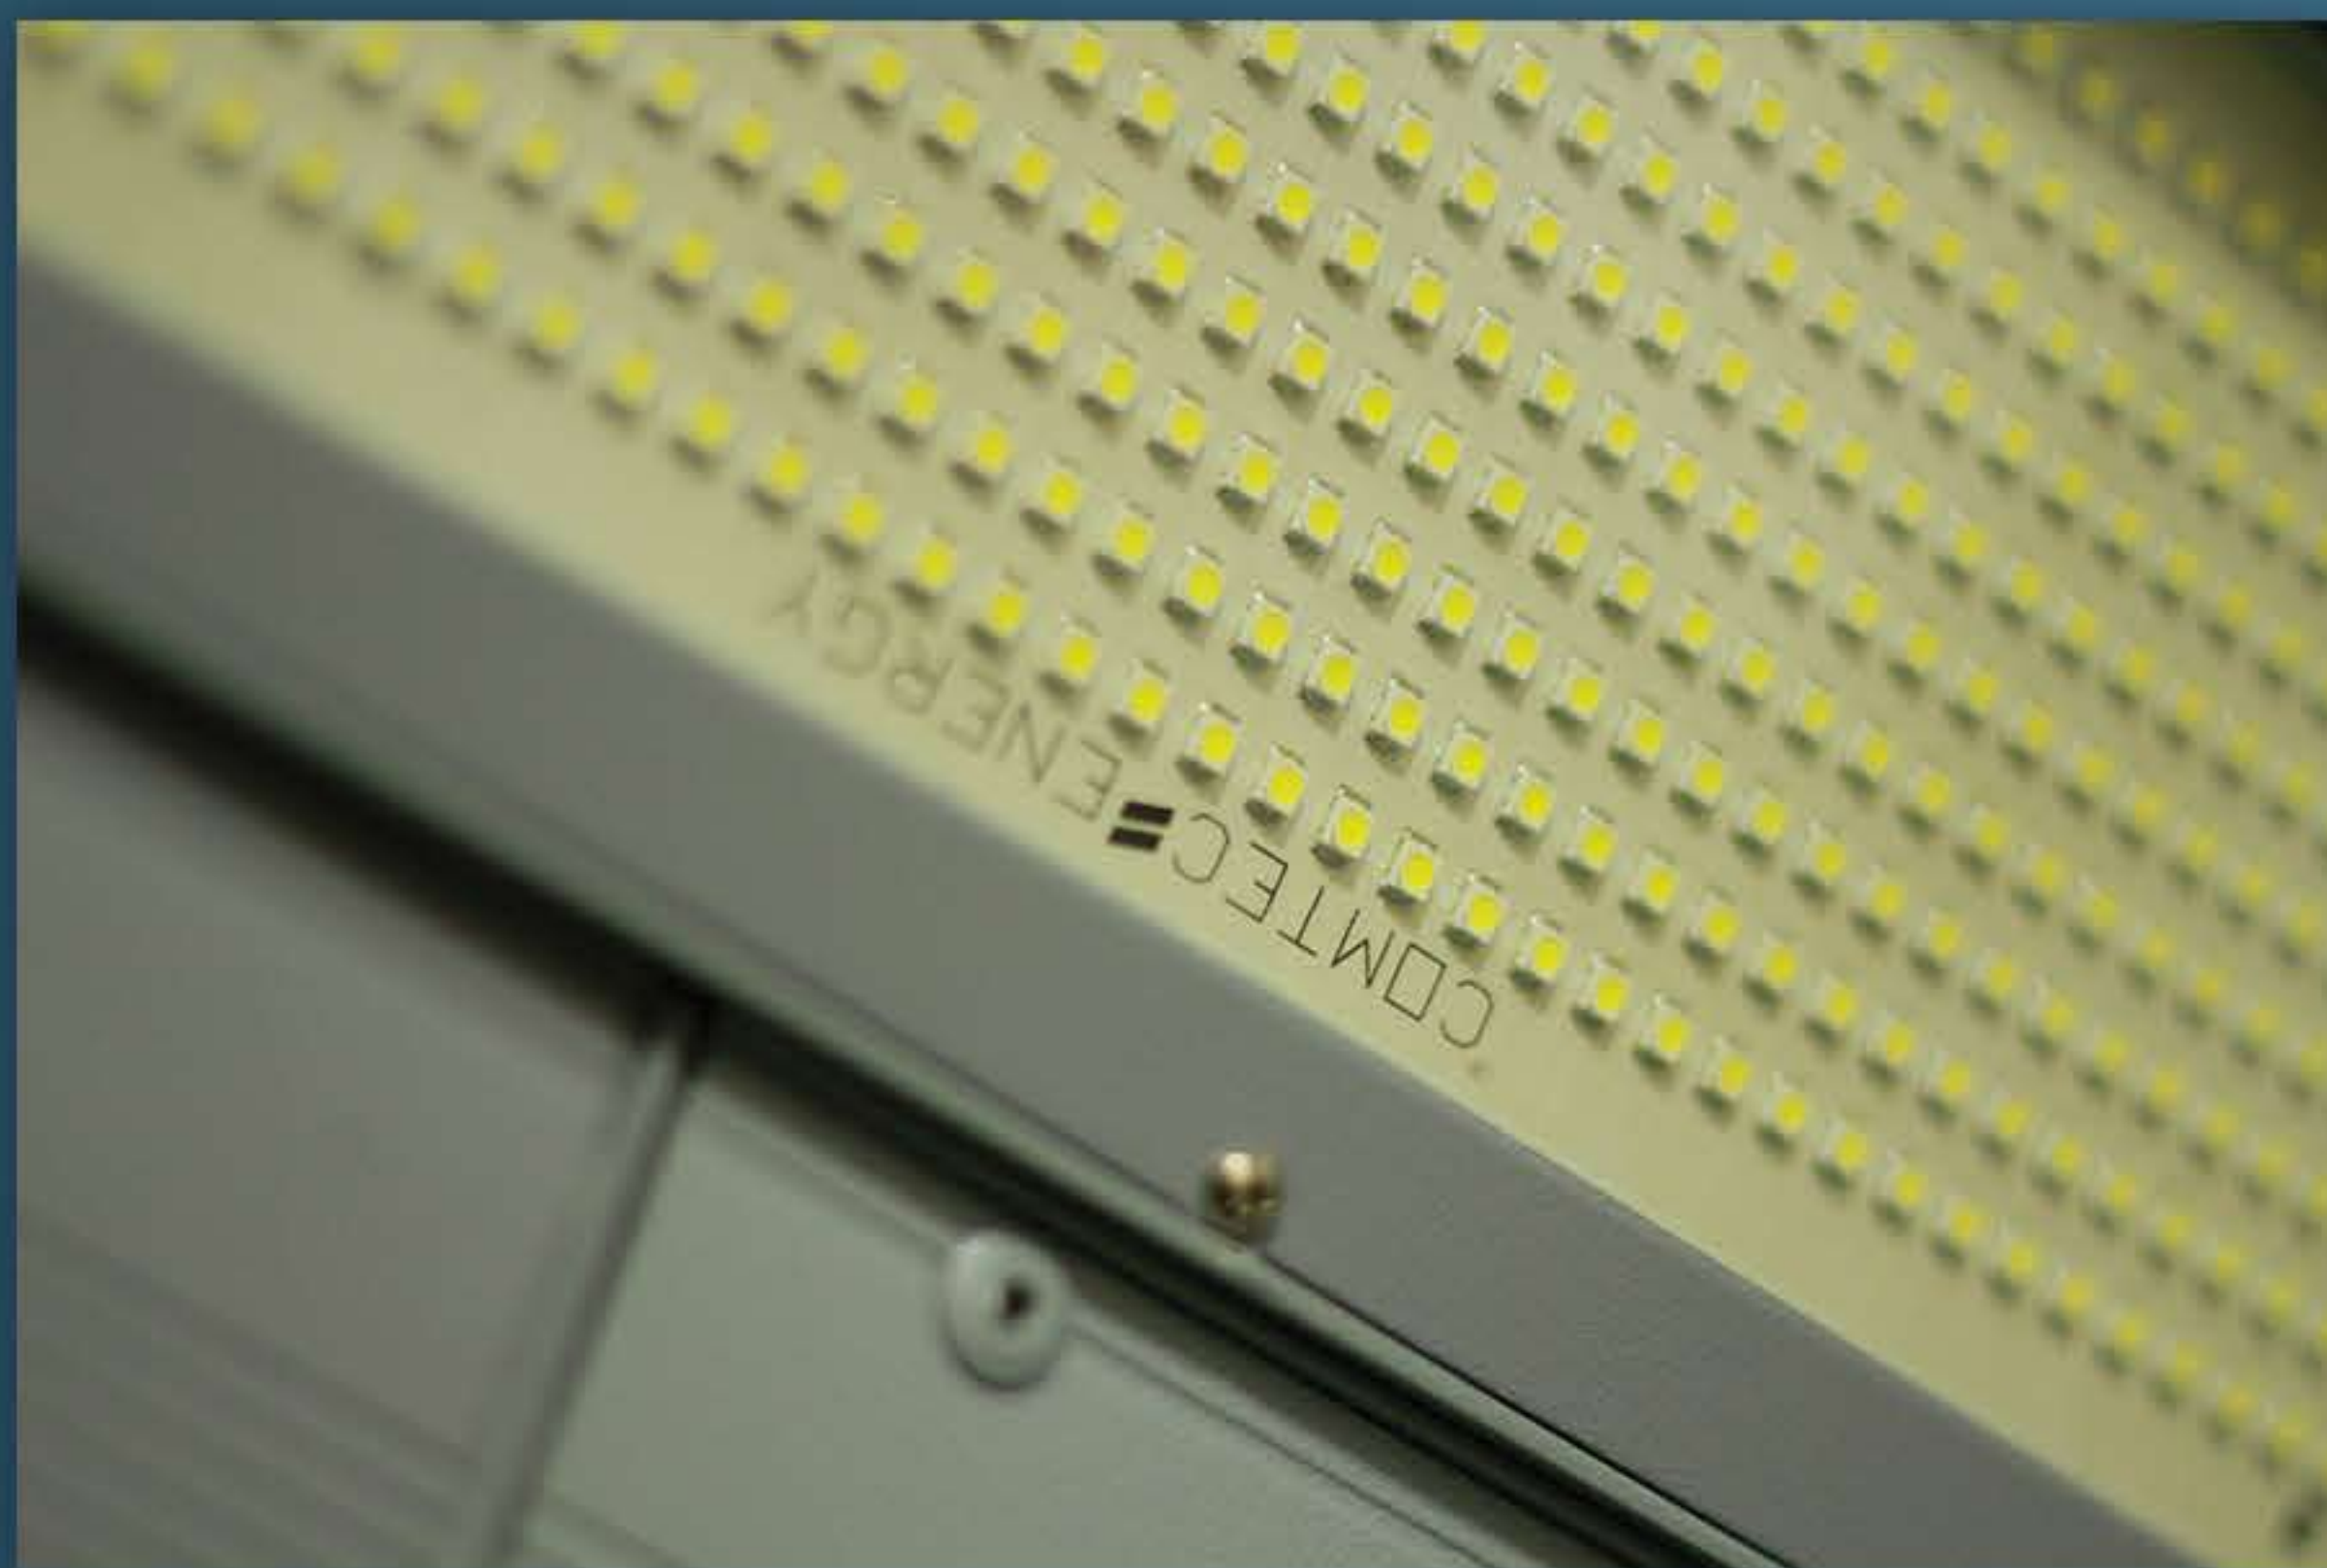

Energy sustains life - PRODUCE ENERGY

Energy is precious - CONSERVE ENERGY

Premium Design By Professionals

Solar is design specific

Designing sustainable systems from intermittent solar - *is a job of art and science*; 'one size fits all' is no way, optimal crafting of resources is essential to achieve the most advantageous results.

Let us switch to Solar

Solar energy is ideally suited to all consumers of electricity who run by day time like schools, colleges, universities, banks, offices etc. Solar water pumping for agriculture and domestic use is yet another progressive realization of the free resource.

Comtec Energy is offering competitive pricing structure for on-grid, hybrid, and off-grid solutions starting from Rs.125,000/kW to 250,000/kW based on "A" grade components and professional design.

Renewable SOLAR ENERGY IS OUR PASSION

The Sun is very kind to our part of the world giving us tremendous opportunity to uplift the living standard of our people - the key is to control the cost by design.

The Levelized Cost of Energy (LCOE) from Solar has become as low as Rs.4/kWh considering 25 years life of solar panels and various quality inverters.
